

Morpho at Money 20/20 Europe 2016: Building value and confidence through the entire digital journey

Morpho (Safran), world leader in digital identity and security solutions, invites visitors to Money 20/20 Europe – the world's largest financial technology event, which is coming to Europe for the first time. Attendees can experience the company's latest solutions for banking and payment

PAYMENT

POSTED ON 04.04.16

The digital migration with technological innovations such as biometrics, mobile and cloud computing is on the fast track. To meet these challenges, Morpho, is leveraging its industry-leading expertise to offer innovative solutions that in particular reinforce authentication processes and ensure more seamless experiences for the end user. Financial institutions and their customers benefit from increased security via trust services and long-term data protection, greater convenience through paperless transactions as well as reduced fraud, thanks to easy-to-use biometric authentication and payment methods such as selfies and fingerprints.

Visitors can learn more about the following solutions on the Morpho stand:

- ➔ **Customer registration:** Knowing Your Customer (eKYC) and verifying his/her information and identity is the first and most critical step in any banking relationship. Morpho is demonstrating its self-registration solution based on mobile technology and facial recognition.
- ➔ **Authentication & Transaction:** Strong authentication with biometrics ; smartphone-based digital signature, enabling customers to remotely subscribe to a banking contract ; digital vault preserving the legally binding character of data over time.
- ➔ **Biometrics & Payment:** Innovative mobile payment scenarios both in store and online, leveraging key technologies such as biometrics, secure wallet, match-on-card, NFC, tokenization and HCE. Morpho will demonstrate a proximity payment solution with just a swipe of a hand via MorphoWave™, the world's fastest contactless fingerprint scanner, capturing and matching four fingerprints simultaneously.
