

IDEMIA receives CB qualification for the metal card manufacturing process at its Exton, Pennsylvania site

This achievement cements IDEMIA's position as a trusted partner for financial institutions and card issuers for metal cards

POSTED ON 07.24.23

IDEMIA has achieved a significant milestone in the payment card industry by becoming the first ever company to receive CB qualification for its range of metal cards manufactured at its Exton, Pennsylvania site in the United States. This achievement underscores IDEMIA's commitment to excellence and adherence to quality standards for this cutting-edge manufacturing process.

IDEMIA's manufacturing site in Exton employs a highly skilled workforce and is equipped with state-of-the-art production lines dedicated to metal cards.

The CB qualification is a guarantee of quality, attesting that the products manufactured at this site have successfully undergone tests that meet the strict requirements set by CB, the leading card and mobile payment system in France.

Pierre Chassigneux, Director of Projects and Evolutions, CB

IDEMIA's Metal Cards are made from recycled metals. With a highly talented design team that provides personalized designs down to the individual level. IDEMIA is the preferred partner for numerous traditional and digital banks and card issuers.

We are very proud of this achievement. The many years of work by our employees in the R&D and manufacturing product teams have paid off. Through the issuance of this qualification by CB, IDEMIA's expertise and commitment to providing high-quality new metal card products are recognized.

Manuel Inconnu, Business Line Director, Metal Cards, IDEMIA
