

Deutsche Bank, Mastercard and IDEMIA launch the first MOTION CODE card in Spain

Deutsche Bank launches the Tarjeta Calma, the first card in Spain including IDEMIA's MOTION CODE dynamic security code technology.

PAYMENT

POSTED ON 12.23.19

Deutsche Bank, Mastercard and IDEMIA launch the first **MOTION CODE™** card in Spain called the Tarjeta Calma.

MOTION CODE™ technology consists in a **dynamic cryptogram changing randomly to provide better security for online payment** by preventing data theft and cloning.

The **dynamic CVC** at the back of the Tarjeta Calma will update every four hours, making online transactions substantially more secure.

The Deutsche Bank Mastercard Tarjeta Calma will go beyond usual payment card benefits and offers customers the latest security tech so that they can buy online in an environment where online shopping is ever growing. We are thrilled to pioneer this technology in Spain and introduce this new product backed by Mastercard and IDEMIA.
