

IDEMIA and JCB trial of the first F.CODE payment card in Japan

As announced at the Taipei JCB World Conference, on November 2, 2017, IDEMIA, the global leader in Augmented Identity, and JCB, the leading international payment network in Japan, have started the pilot of the first F.CODE Japanese payment card.

POSTED ON 04.18.18

“F for fingerprint”: embrace the future of payments with biometrics.

F.CODE takes card payments to the next level since your fingerprint replaces the PIN code and so reinforces user's security and privacy by ensuring a unique and universal identification.

F.CODE makes customers and retailers' lives easier:

No need to remember a new PIN code, your fingerprint is enough. On the retailer side, it speeds up the check-out process as well as enabling banks and governments to adopt an innovative and secure technology for the future payment experience. F.CODE will enable seamless payment transactions without compromising security.

Recognized for its longstanding expertise and experience in biometrics and payment, IDEMIA has established a strong partnership with JCB regarding payment innovation in Japan. The two companies are proud to offer today, in close partnership with Toppan Printing for the card personalization activity, the “future of payments” to a country always eager to innovate.

We are really delighted to announce this first launch as part of our strong partnership with JCB. F.CODE is a unique technology that provides highly secured authentication and we are eager to implement it for the first time in Japan.

Pierre Barrial, Executive Vice-President of the Financial Institutions Business Unit

As the evolution of payment technologies accelerates dramatically, JCB is committed to keep developing various capabilities that can deliver a convenient and more secure payment experience. This pilot program, through our strong partnership with IDEMIA, is to demonstrate a use case of how JCB intends to provide customers with a secure and smooth way of making payments in the future.

About IDEMIA - OT-Morpho is now IDEMIA, the global leader in Augmented Identity for an increasingly digital world, with the ambition to empower citizens and consumers alike to interact, pay, connect, travel and vote in ways that are now possible in a connected environment.

Securing our identity has become mission critical in the world we live in today. By standing for Augmented Identity, we reinvent the way we think, produce, use and protect this asset, whether for individuals or for objects. We ensure privacy and trust as well as guarantee secure, authenticated and verifiable transactions for international clients from Financial, Telecom, Identity, Public Security and IoT sectors.

OT (Oberthur Technologies) and Safran Identity & Security (Morpho) have joined forces to form IDEMIA. With close to \$3 billion in revenues and 14,000 employees around the world, IDEMIA serves clients in 180 countries.
