

OT-Morpho unveils MorphoTop Slim, its new convenient and innovative solution for enrollment

OT-Morpho, a world leader in digital security and identification technologies, today announced the launch of MorphoTop Slim, its new ultra-compact fingerprint capture product. Breaking with previous generations, it is 6 times smaller than current products, which greatly facilitates its integration into mobile solutions or existing structures.

POSTED ON 09.12.17

Based on the TFT (Thin-Film Transistor) technology, this new ultra-thin terminal allows the capture of 10 fingers flat or rolled. Its speed and quality of acquisition are incomparable (capture of the fingers possible in less than two seconds, improved performance for dry fingers, specific finish to avoid traces).

Like its predecessors, MorphoTop Slim integrates into the MorphoESA enrollment solution. It covers several markets and has a wide range of uses: border control, police investigations, mass enrollment or e-KYC¹.

We have a proven experience in the field of biometric data capture with over one million sensors sold worldwide. We are committed to continuously improve our offer to provide our customers with ever more efficient and easy-to-use solutions, and this new product, which is the result of our research and expertise, is an example.

Philippe Larcher, OT-Morpho, Head of the Security Division, Morpho

MorphoTop Slim is certified FBI IQS Appendix F and will be officially launched at Federal Identity Forum and Expo 2017 (Fed ID), in Washington, DC (September 12-14, 2017).

¹ Know your customer: KYC is the process allowing a company to verify the identity of its clients (eKYC is the digital version of this process).

About OT-Morpho - OT-Morpho is a world leader in digital security & identification technologies with the ambition to empower citizens and consumers alike to interact, pay, connect, commute, travel and even vote in ways that are now possible in a connected world.

As our physical and digital, civil and commercial lifestyles converge, OT-Morpho stands precisely at that crossroads to leverage the best in security and identity technologies and offer customized solutions to a wide range of international clients from key industries, including Financial services, Telecom, Identity, Security and IoT. With close to €3bn in revenues and more than 14,000 employees, OT-Morpho is the result of the merger between OT (Oberthur Technologies) and Safran Identity & Security (Morpho) completed in 31 May 2017. Temporarily designated by the name "OT-Morpho", the new company will unveil its new name in September of this year.
