

Safran Identity & Security reveals its contribution to the new Mastercard biometric card

Safran Identity & Security (ex Morpho) announced today that it is contributing with biometric card software and manufacturing capacities for the recently announced Mastercard next generation biometric card.

PAYMENT

POSTED ON 05.15.17

This new generation payment card combines **chip technology** and **biometrics** to a strong and convenient means of **authentication** at the Point of Sale (POS). Instead of entering a PIN, cardholders simply place their finger onto the card. Their fingerprint is then matched against the biometric template on the card.

Its ability to link an individual's biometric identity to a payment card opens up a wide range of new ways to use the card beyond authenticating payment transactions. Furthermore, the card helps issuers to reduce fraud and increase customer loyalty by ensuring that their card stays on top of their customer's wallets.

We are proud to leverage our unique biometric expertise and facilitate the future of payments together with Mastercard. Biometrics enables seamless payment transactions without compromising security.

Anne Bouverot, president and chair of Safran Identity & Security

OT-Morpho - is now IDEMIA, the global leader in trusted identities for an increasingly digital world, with the ambition to empower citizens and consumers alike to interact, pay, connect, travel and vote in ways that are now possible in a connected environment.

Securing our identity has become mission critical in the world we live in today. By standing for Augmented Identity, we reinvent the way we think, produce, use and protect this asset, whether for individuals or for objects. We ensure privacy and trust as well as guarantee secure, authenticated and verifiable transactions for international clients from Financial, Telecom, Identity, Security and IoT sectors.

With close to €3bn in revenues, IDEMIA is the result of the merger between OT (Oberthur Technologies) and Safran Identity & Security (Morpho). This new company counts 14,000 employees of more than 80 nationalities and serves clients in 180 countries.
