IDEMIA

MorphoFACE: the new facial recognition solution from Safran Identity & Security

Safran Identity & Security unveils its new solution for seamless face acquisition and on-the-spot identity verification at Passenger Terminal EXPO. Dedicated to private and public organizations, MorphoFACE integrates the company's state-of-the-art face recognition technologies, ensuring a high level of accuracy.

 #   TRAVEL

POSTED ON 03.14.17

MorphoFACE particularly* helps airports and border checkpoints deal with the increasing number of travellers by providing a fast and highly secure **biometric solution** for **face capture** and matching in one single **connected device**. Based on the latest **3D video analysis** technology, this solution combines reliability and ergonomics to enable a steady and seamless flow of users.

The compact unit offers a completely non-intrusive experience for travelers. It features only fixed components and can more quickly capture a wide range of sizes and profiles than conventional solutions which must mechanically adjust before acquisition. In addition, **MorphoFACE** has anti-spoofing capabilities to deliver robust, convenient **identity check** (against an ID document) or **person identification** (against a list of persons of interest).

> *In a globalized world where airports and border checkpoints are vital hubs, we believe that 'on the move' biometrics will play a key role in securing borders while reducing wait times and improving travel experience. With our offer, we are proud to contribute to make our borders safer and smarter.*

Samuel Fringant, Executive Vice President, Security Division at Safran Identity & Security

MorphoFACE is an interoperable solution which can be integrated into existing environments (e-gates, self-bag drop systems, kiosks, etc.). It is available for customers as a turnkey solution or as an embeddable kit for third parties to design their own customized solutions.

Safran Identity & Security will present this new solution at Passenger Terminal EXPO (Hall 8- Booth 10060).

MorphoFACE can also be used to secure sensitive sites, ports, train stations or financial institutions.

OT-Morpho - is now IDEMIA, the global leader in trusted identities for an increasingly digital world, with the ambition to empower citizens and consumers alike to interact, pay, connect, travel and vote in ways that are now possible in a connected environment.

Securing our identity has become mission critical in the world we live in today. By standing for Augmented Identity, we reinvent the way we think, produce, use and protect this asset, whether for individuals or for objects. We ensure privacy and trust as well as guarantee secure, authenticated and verifiable transactions for international clients from Financial, Telecom, Identity, Security and IoT sectors.

With close to €3bn in revenues, IDEMIA is the result of the merger between OT (Oberthur Technologies) and Safran Identity & Security (Morpho). This new company counts 14,000 employees of more than 80 nationalities and serves clients in 180 countries.
