

Safran Identity & Security successfully achieves GSMA security accreditation for eSIM Subscription Management services

Safran Identity & Security has successfully achieved the GSMA Security Accreditation Scheme certification (SAS-SM) for eSIM Subscription Management services at its French datacenter, becoming one of the first vendors worldwide to obtain this status.

CONNECTIVITY

POSTED ON 02.09.17

This accreditation is a key milestone in the deployment of Safran's **MorphoFlex** Remote SIM Provisioning solution for the **Internet of Things** (IoT) market and confirms its compliance at the highest levels of security required by the industry.

MorphoFlex™ enables the remote lifecycle management of **embedded SIMs (eSIM)** in a standardized and interoperable way, allowing **connected devices** to remain generic throughout the supply chain until they reach their end-market or end-user. From the creation of telecom subscriptions to their download, activation, deactivation and deletion, **MorphoFlex™** ensures end-to-end protection of **mobile operators' assets and credentials**.

Safran Identity & Security's German manufacturing plant has already achieved GSMA Security Accreditation Scheme certification (SAS-UP) for eSIM production, demonstrating the capacity to manage integrity and **confidentiality of mobile operators' data** according to the highest security standards set by GSMA.

This certification demonstrates our clear commitment to security and interoperability. The commercial launch of MorphoFlex™ facilitates the deployment of a new generation of connected devices and addresses the need for seamless and flexible connectivity management in every IoT vertical market. The teams working on eSIM and Remote SIM Provisioning are doing an amazing job and prove every day Safran Identity & Security's willingness to exceed our customers' expectations.

Yves Portalier, VP and General Manager of the Telecom Business Unit at Safran Identity & Security

OT-Morpho - is now IDEMIA, the global leader in trusted identities for an increasingly digital world, with the ambition to empower citizens and consumers alike to interact, pay, connect, travel and vote in ways that are now possible in a connected environment.

Securing our identity has become mission critical in the world we live in today. By standing for Augmented Identity, we reinvent the way we think, produce, use and protect this asset, whether for individuals or for objects. We ensure privacy and trust as well as guarantee secure, authenticated and verifiable transactions for international clients from Financial, Telecom, Identity, Security and IoT sectors.

With close to €3bn in revenues, IDEMIA is the result of the merger between OT (Oberthur Technologies) and Safran Identity & Security (Morpho). This new company counts 14,000 employees of more than 80 nationalities and serves clients in 180 countries.
