Safran supplies terminals for the Catalonia lottery in Spain

POSTED ON 06.09.16

Safran Identity & Security announced today that it has delivered 2,500 S8 lottery terminals to the Catalonia Lottery in Spain, within the scope of a strategic partnership with Novomatic Lottery Solutions (NLS). The software embedded in these terminals was developed in conjunction with Lotsys, a subsidiary of Française des Jeux (FDJ), the French lottery operator.

> *This latest contract clearly confirms the capabilities of Safran's gaming terminals, along with our ability to mobilize technical and industrial resources to offer solutions tailored to our customers' specific needs.*
>
> *Samuel Fringant, EVP, Security Division, Safran Identity & Security*

> *The NLS system is a state of the art solution utilizing the most modern technologies in the industry. It was important to us that this was the case end to end. This is why we chose Safran as our partners for the retail element of our solution. Sharing the same values of quality, technology and performance made Safran a perfect fit.*
>
> *Miriam Lindhorst, CEO de NLS, the Catalonia Lottery operator*

The terminals were successfully commissioned throughout Catalonia on April 1, 2016. Nearly 900 screens that display information for players were also supplied as part of the contract. This was Safran's first gaming terminal contract in Spain, and its first time teaming up with NLS.

More than 90,000 **S8 terminals** have been delivered worldwide, making it the global benchmark for **multifunction terminals with an A4 scanner**. Like all of **Safran's modular terminals**, it can be customized to adapt to the specific needs of each lottery or betting operator.

About IDEMIA - OT-Morpho is now IDEMIA, the global leader in Augmented Identity for an increasingly digital world, with the ambition to empower citizens and consumers alike to interact, pay, connect, travel and vote in ways that are now possible in a connected environment.

Securing our identity has become mission critical in the world we live in today. By standing for Augmented Identity, we reinvent the way we think, produce, use and protect this asset, whether for individuals or for objects. We ensure privacy and trust as well as guarantee secure, authenticated and verifiable transactions for international clients from Financial, Telecom, Identity, Public Security and IoT sectors.
OT (Oberthur Technologies) and Safran Identity & Security (Morpho) have joined forces to form IDEMIA. With close to $3 billion in revenues and 14,000 employees around the world, IDEMIA serves clients in 180 countries.
