

the innovative IDEMIA technology already adopted by over 300,000 Societe Generale personal grunding and grunding the three-digit security code printed on the back of bank cards with a mini screen playing a new dynamic" code every hour. If the card's data is hacked, the security code quickly becomes obsolete, stopping fraudsters reusing the data on e-commerce sites. The solution is both reassuring and simple for customers as the online purchase process remains unchanged.

The option is available to Societe Generale customers with a Business (Visa Business, Visa Gold Business) or Corporate card (Visa Affaires, Visa Gold Affaires) costing €12 a year, in addition to the annual fee.

With this solution, we're giving more peace of mind to professionals, company directors and their staff, who are particularly demanding and risk-aware customers.

Philippe Marguetty, Societe Generale's Director of Payments

At IDEMIA, we're proud to bring Societe Generale ever-more innovative solutions. IDEMIA has adapted its offering to the wants and needs of demanding customers in terms of banking data security: business and corporate customers.

Pierre Barrial, IDEMIA Executive Vice-President for Financial Institutions
