OCTOBER 2020

## IDEMIA PAYCHECK

### NEW CUSTOMER JOURNEYS

We are currently witnessing how the smartphone and the physical payment card blend into an integrated consumer journey. An illustrative case is the Apple Card and the Wallet app<sup>1</sup>. The user applies for the card via the app<sup>1</sup>. Once approved, the user can then enjoy very user friendly notifications (for example showing where card transactions were done on a map<sup>1</sup>), the card balance is presented in an intuitive way<sup>2</sup> and can be paid from a web interface<sup>3</sup>, reporting suspicious transactions<sup>1</sup> or (temporarily) locking and unlocking the card can be done with a few taps in the app<sup>1</sup>.

#### BLENDING THE PHYSICAL CARD AND THE SMARTPHONE

16%

Annual growth rate in mobile banking users 2014 - 2024<sup>6</sup>

79%

4 customers out of 5 use their mobile banking app to view card transactions<sup>9</sup>
