IDEMIA

Morpho chosen to help Victoria Police strengthen its criminal identification system

Sydney, January 12, 2016 - Morpho (Safran Group) announced today it has been selected for the provision of additional biometric capability to Victoria Police, in Australia, allowing front line police to collect and check identity information quickly and accurately.

 # JUSTICE & PUBLIC SAFETY

POSTED ON 01.12.16

Morpho will refresh the current fleet and increase the number of fingerprint and face capturing stations (LiveScans) up to 92 at Victoria's police stations across metropolitan and remote locations. This one stop Kiosk will integrate Fingerprint, Palmprint and facial capture in one solution providing significant efficiency gains.

Victoria Police's facial recognition capability will almost quadruple in capacity. Under this contract, Victoria Police is increasing its fleet of fingerprinting capture equipment by an additional 20 stations for greater coverage across the state. This will raise the percentage of electronically captured prints in Victoria well above 90% providing real time identification.

Morpho's proven expertise in Australia played a major role in winning this new contract. We have been working closely with the Victoria Police for twelve years, and have already supplied 72 stations to record fingerprints and palmprints. By expending its fingerprint and facial identification capability, Victoria Police is once again a technology pioneer and one of the best equipped police forces in the world.

Tim Ferris, managing director of the local subsidiary Morpho Australasia

Morpho will provide full service as part of a ten-year agreement, including the upgrade of Victoria Police's facial recognition software with Morpho's latest biometric engine, full refresh of current LiveScan fleet as well as delivery of additional units, scheduled in 2016.

About IDEMIA - OT-Morpho is now IDEMIA, the global leader in Augmented Identity for an increasingly digital world, with the ambition to empower citizens and consumers alike to interact, pay, connect, travel and vote in ways that are now possible in a connected environment.

Securing our identity has become mission critical in the world we live in today. By standing for Augmented Identity, we reinvent the way we think, produce, use and protect this asset, whether for individuals or for objects. We ensure privacy

and trust as well as guarantee secure, authenticated and verifiable transactions for international clients from Financial, Telecom, Identity, Public Security and IoT sectors.
OT (Oberthur Technologies) and Safran Identity & Security (Morpho) have joined forces to form IDEMIA. With close to $3 billion in revenues and 14,000 employees around the world, IDEMIA serves clients in 180 countries.
