

Nigeria retains Safran Identity & Security to provide an upgraded automatic biometric identification system and maintenance support

Safran Identity & Security announced today the renewal of its contract with the National Identity Management Commission of Nigeria (NIMC).

IDENTITY

POSTED ON 04.04.17

The renewed service and maintenance contract includes the upgrade of the existing **automatic biometric identification system (ABIS)** to the new **MorphoBSS (Morpho Biometric Search Services)** using three types of **biometrics**: face, iris and fingerprints. Safran Identity & Security is also commissioned by the NIMC to maintain the solution.

This system will enable the NIMC to create a reliable identity database of citizens and residents of Nigeria and each person will be identified by a unique **National Identification Number (NIN)**. This operation will support the overall objectives of the Commission in its harmonization drive of existing databases of all federal agencies in the country.

With a population of over 186 million, Nigeria is the most populous country in the African continent. For Nigerians citizens and residents, this new system will also be the vehicle to drive other value added services such as **verification** and **authentication** services.

We are very proud to have been selected by Nigeria to upgrade their identity management system. Our experience in large-scale projects like this one and our expertise in biometrics enable us to respond to the national authorities' requirements and provide a comprehensive and operational solution. In this way, our contribution not only helps optimize national identity management in this country but also promotes the development of new governmental services for citizens

Anne Bouverot, CEO and Chair of Safran Identity & Security

OT-Morpho - is now IDEMIA, the global leader in trusted identities for an increasingly digital world, with the ambition to empower citizens and consumers alike to interact, pay, connect, travel and vote in ways that are now possible in a connected environment.

Securing our identity has become mission critical in the world we live in today. By standing for Augmented Identity, we reinvent the way we think, produce, use and protect this asset, whether for individuals or for objects. We ensure privacy

and trust as well as guarantee secure, authenticated and verifiable transactions for international clients from Financial, Telecom, Identity, Security and IoT sectors.

With close to €3bn in revenues, IDEMIA is the result of the merger between OT (Oberthur Technologies) and Safran Identity & Security (Morpho). This new company counts 14,000 employees of more than 80 nationalities and serves clients in 180 countries.
