IDENTITY

POSTED ON 08.01.19

With IDEMIA's backing and cutting-edge technology, Vinaphone will be the sole Vietnamese mobile operator to offer digital signature and secure ID authentication services. This partnership will result in the development of mobile digital ID services and will lead to more user-friendly and secure Vinaphone customer access to eGovernment services and online retailers. By doing so, it will also boost growth of mobile eServices in Vietnam.

IDEMIA offers mobile operators its globally acclaimed digital ID know-how, designed to strengthen online security. The firm's solution is compatible with both Mobile PKI and GSMA Mobile Connect allowing Vinaphone to easily adopt Mobile Connect services and eventually offer other ground-breaking features to its customers.

We are thrilled that Vinaphone has selected our Mobile PKI package. This choice consolidates our market leadership and demonstrates that our SIM technology is a "must have" for even more customers using bank accounts and digital services who expect highly secured online services.

IDEMIA Executive VP Mobile Operators Fabien Jautard

Our top priority is to give customers watertight security and user-friendly services. IDEMIA's mobile PKI solution allows us to deliver value-enhancing services to our corporate customers before we turn to the consumer market with our future Mobile Connect package. We chose IDEMIA because it is definitely the right firm to team up with on both markets given its longstanding cutting-edge expertise in SIM technology and solutions for mobile operators.

Vinaphone's Marketing & VAS Service Manager Le Toan Thang

About us - IDEMIA, the global leader in Augmented Identity, provides a trusted environment enabling citizens and consumers alike to perform their daily critical activities (such as pay, connect and travel), in the physical as well as digital space.

Securing our identity has become mission critical in the world we live in today. By standing for Augmented Identity, an identity that ensures privacy and trust and guarantees secure, authenticated and verifiable transactions, we reinvent the way we think, produce, use and protect one of our greatest assets – our identity – whether for individuals or for objects, whenever and wherever security matters. We provide Augmented Identity for international clients from Financial, Telecom, Identity, Public Security and IoT sectors.

With 13,000 employees around the world, IDEMIA serves clients in 180 countries.
