

TravelKiosk™ Light

Compact self-service solution to streamline the passenger journey

Passenger volumes are surging, while budgets and resources remain constrained.

Reduce passenger queues, boost resource utilization and security measures, and increase valuable passenger dwell time with IDEMIA's scalable, biometric-based, self-service solution.

IDEMIA Public Security's TravelKiosk™ Light has all the core features essential for effective passenger processing in a cost-effective, streamlined design. It is a self-service solution that allows passengers to complete the registration process whether at check-in or immigration pre-checks.

It can also operate as an identity verification terminal that enables a smooth passenger experience throughout the terminal using facial biometrics, such as lounge access and boarding.

Reliable identity verification

- > High-quality biometric capture
- > Best-in-class matching accuracy
- > Robust document authentication

User-friendly

- > User-centric: intuitive, ergonomic, and non-intrusive
- > Compatible with all traveler profiles

Easy operation

- > Transportable for easy redeployment
- > Extra-small footprint

TravelKiosk™ Light in action today

Serving the travel industry for decades, IDEMIA Public Security is your number one partner to help you implement high-performance border control and passenger flow facilitation projects. With over 50 years' experience, we are the undisputed leader in biometric technology. Our algorithms—often called the most accurate, fair, and consistent on the market—are constantly ranked in the top tier in NIST evaluations.

TravelKiosk™ Light is already supporting the travel industry in

securing borders and smoothing the passenger journey around the world.

In Australia and the USA, border control agencies deployed TravelKiosk™ Light for traveler registration and reliable immigration pre-checks at several border checkpoints.

At Orly Paris Airport and Lyon Saint-Exupéry (France), TravelKiosk™ Light is creating a unique biometric identifier for every traveler, allowing them to breeze through the various touchpoints across the airport terminal.

» Slimline, versatile biometric self-service kiosk

High-quality facial image

Travel document reader and authenticity check

2D/QR code reader

Customizable GUI

Colored status light for 360° kiosk visibility

15" touch screen

Transportable with integrated wheels

TravelKiosk™ Light additional benefits

#1 BIOMETRIC TECHNOLOGY

- › **Fast** face capture and processing
- › **Fair, unbiased** biometric technology
- › **Presentation Attack Detection (PAD)**
- › **GDPR compliant**

USER-FRIENDLY

- › **Fastest** capture and matching time: <2 sec
- › **Less** waiting time, reduced traveler stress
- › **Suitable** for a wide range of traveler profiles
- › **Accessible** to people with reduced mobility

EASY OPERATION

- › **Limited overall height** and **small footprint**
- › **Optimized** total cost of ownership: effective use of space and resources, and easy to maintain
- › **Easy** to connect to existing IT ecosystems
- › **Centralized** technical monitoring and maintenance

MODULAR DESIGN

Optional modules to meet specific use cases

- › **Four-fingerprint** capture
- › **Receipt** printer
- › **10" touch screen**
